CRANE AND HOIST REMOTE CONTROLS STREET RX2 & RX4

RX2 - PUSHBUTTON CONTROL FOR 3-MOTION SIMPLE CRANES AND HOISTS

The RX2 represents the next generation of handheld units and is ready to operate in the 2.4 GHz universal band with frequency management. With the user perspective in mind, the RX2 is compact and light without sacrificing robustness. The improved ergonomics prevent the user from suffering postural fatigue. This handheld transmitter is our latest solution for standard overhead crane applications.

FEATURES & BENEFITS

- High sensitivity two-step push button control
- External, removable EEPROM SIM module
- Frequency management preventing interference
- Hoist selection push button and indication
- Two transmitters
- LED indicator on light
- Audible buzzer (9/db)

RX4 - FOR CRANES AND HOISTS REQUIRING MORE FUNCTIONS / TANDEM CONTROL OF TWO CRANES

The RX4 pushbutton controller is built on a brand new software platform that offers the most advanced technology in use today. RX4 controllers are highly customisable with many features and accessories. In addition the RX4 supports the operator with an ergonomic design that allows for safe and efficient use.

FEATURES & BENEFITS

- Highly customisable
- Easy and fast maintenance
- High resistance to impacts
- Improved ergonomics
- Screen display
- Two transmitters
- Optional feedback
- Optional tandem control to EN15011
- 2.4 GHz system with frequency management and option of multi-band radio with Full-Duplex
- Available in 6 or 8 pushbutton versions

RX2

RX4

RX2/RX4 remote controls

wristband

2x BT11K Lithium batteries

charger

RX2: R11 receiver

RX4: R13 or R70 receiver

STREET RX6

RX6 - JOYSTICK SYSTEM FOR ADVANCED CRANES AND HOISTS

The RX6 transmitter is highly customisable with many features and accessories. This remote controller also supports the operator with an ergonomic design that allows for safe and efficient operation.

FEATURES & BENEFITS

- Easy and fast maintenance
- Non-slip handles
- Innovative ergonomics
- High resistance to impacts
- External EEPROM
- Optional feedback
- Optional tandem control to EN15011
- 2.4 GHz system with frequency management and option of multi-band radio with Full-Duplex
- Available with 3 to 4 joysticks or 2 to 8 paddle controls

RX6 remote control

waistbelt

2x Lithium batteries: BT11K or BT271K

charger

R13 or R70 receiver

Note: RX6 kit contains one controller only

IMPROVED BATTERY ARCHITECTURE
Renewed battery for increased durability and lifetime

RX6 ONLY - STANDARD MAIN MECHANISMS
2 joysticks for crane, trolley and hoist movement or paddle control

2.4 GHz UNIVERSAL FREQUENCY
Frequency management against interferences

ADDITIONAL AUXILIARY MECHANISMS
Optional push buttons, toggle and spring return switches

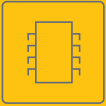

HOIST SELECTION
Optional rotary switch

MORE ERGONOMIC
Improved grip

MORE ROBUST
High resistance to impacts

EEPROM SIM MODULE
External removable

All features apply to all hand controllers except where indicated.
